

Sprays for any application

Cellpack offers the electrician a suitable spray for any application: for degreasing, as corrosion protection, for cooling, as protective, insulating or clear lacquer and as a lubricating, insulating or multifunction oil. A cleaning spray for hard-to-reach places and a lubricating spray for installing cables round off the product range.

Electrical Products

Professional Sprays from Cellpack

Cable Gliss – lubricant

Cable Gliss (400 ml) Art. No. 124050 – for installing cables and wires in electrical wiring conduit – does not dry out or become sticky.

Universal Cleaner 121 – cleaner

Universal Cleaner 121 (400 ml) Art. No. 146404 – Our classic product for fast cleaning and degreasing of electrical systems and equipment, even when energised, as not electrically conductive. Oil, grease and dirt don't have a chance.

Zinc Spray 171 – corrosion protection

Zinc Spray 171 (400 ml) Art. No. 124030 – Repairs damaged zinc coatings and galvanic surfaces, primes, seals and protects against corrosion and oxidation.

Electro 2-26 – lubricant

Electro 2-26 (400 ml) Art. No. 124045 – Lubricates and penetrates into electrical system parts and equipment. Protects against spark-over, creepage currents and short circuits. Improves the resistance coefficient.

Industrie 3-36 – protective agent

Industrie 3-36 (400 ml) Art. No. 124014 – For protection of iron and non-ferrous metals during storage, processing and transport. Protects against moisture. Dissolves rust and releases jammed parts.

Contact Cleaner – cleaning spray

Contact Cleaner (400 ml) Art. No. 124024 – Cleans sensitive electrical and electronic equipment. Removes light soiling like dust, fibres, thin layers of oil or fingerprint residues.

Urethan transparent - Urethan red – protective and insulating lacquer

Urethan transparent (400 ml) Art. No. 124017 – Urethan red (400 ml) Art. No. 124022 – Protects against the effects of chemicals on equipment and materials. Protective coating for electric motors, transformers, components and equipment.

Plastic – clear lacquer

Plastic (400 ml) Art. No. 124049 – Seals off. Protects PCBs, electrical components, wires and cables. Protective film against a large number of acids and bases, alcohols, moisture and negative environmental influences. Seals off cardboard, wood and leather.

Silicon – insulating and lubricating oil spray

Silicon (400 ml) Art. No. 124032 – Suitable as a moisture buffer. Insulates and protects against sparking-over at plug-in contacts, e.g. tube bases. Parting agent for plastics production.

Duster – cleaning gas

Duster (200 ml) Art. No. 124051 – Cleans hard-to-reach places. Proven in the photo, optics, watch and clock making, precision and electronics industries.

Minus – cooling spray

Minus (200 ml) Art. No. 124044 – For thermal fault diagnosis, cooling down to -50°C, quick and reliable. Does not attack common design materials. Evaporates immediately without leaving behind residues. Cools down heat-sensitive components. Prevents overheating during soldering. Quickly effects thermal switches, thermostats, etc.

Multi – multifunction spray

Multi (200 ml) Art. No. 124043 – Multifunctional, dissolves rust, cleans and displaces water. Protects and lubricates, eliminates squeaking. Does not attack rubber, plastics, textiles or paints. - For electrical/mechanical, workshop/industry, hobby, home, garden and do-it-yourself applications.
